Why

Bangalore was once called the 'Garden City'. Not anymore. Groves of blooming trees have been replaced by concrete jungles. Parks have buckled under the pressure of the rapidly expanding city. Waterways have been irreparably damaged. The air we breathe has become polluted beyond recognition.

While development has brought the city great wealth, life has taken a hit. Traffic bottlenecks have become the new norm of the city. Overtime, stress and unhealthy food habits have given way to many lifestyle illnesses. And now that everyone is consumed by the smartphone, we have even lost touch with our loved ones.

It has reached such a tipping point that there is only one way out. Escape.

Where

It's an idyllic strip of land that is tucked away inside a cocoon of lush greenery and nature-rich goodness on the way to Vijayapura. It's just 2 min. from the NH7 highway, 10 min. from the international airport and 25 min. from the Hebbal flyover. Reputed educational institutions, world-class healthcare centres, clubs and resorts are all close by. It's decked with amenities like an amazing clubhouse, swimming pool, multipurpose hall, party hall, billiards and cards room, table tennis, mini football court and the like.

A place where birds wake you up with their songs every morning. A place far removed from the city that you wouldn't have to worry about rush hours or work pressures. The air is so fresh and the water is so pure that it detoxes you completely. All you have to do is just lean back, relax and enjoy the blissful life.

It's a haven of BIAPPA approved, idyllic villa plots perfectly suited for your dream home.
