*Ab zindagi mein honge
annginat khushiyon ke pal!*

WHY PANVEL?

Panvel is one of the fastest developing suburbs of Navi-Mumbai and will be seeing a lot of infrastructural growth in the coming years making it the pivot point of growth making it the most fertile market for investors and customers who are seeking financial growth in minimum time. Panvel also offers accessibility into Mumbai City and outside it with ease with upcoming infrastructural development plans for connectivity laid out by the government, its geographic location offers clean and fresh air owing to its proximity to nature which makes it truly a dream location for residents who wish to settle down in this part of the city.

ENTRANCE PLAZA

SMARTLY DESIGNED COMMON AMENITIES FOR LOWER MAINTENANCE!

GARBAGE MANAGEMENT PLANT

The 'Internal Garbage Management Plant' helps in processing the organic waste and converting it into manure which can be used to maintain the trees and gardens within the project and the excess manure could be sold off. This helps in reducing the garden maintenance bill what's more it also provides additional income to the society which can be used for common expenses further reduction of maintenance bills for the society.

RAIN WATER HARVESTING PLANT

The rain water harvesting plants through out the project help in collecting the rain water, this could be used for flush tanks, Thus reducing the wastage of potable water as it helps in further reducing the water bill thus resulting in low maintenance bills. Grass pavers around parking spaces help in swelling the water table for increased water harvesting.

THOUGHTFUL LANDSCAPING

Meticulously planned landscapes that involve a majority of indigenous trees, in which 50% would be fruit bearing, 30 % would be flowering as well as bird nesting trees, and 20% would be decorative trees. Tree Plantations help in reducing the ambient temperatures through out the project which makes life breathable and facilitates a pleasant atmosphere.

SOLAR ELECTRICITY AND LED LIGHTING

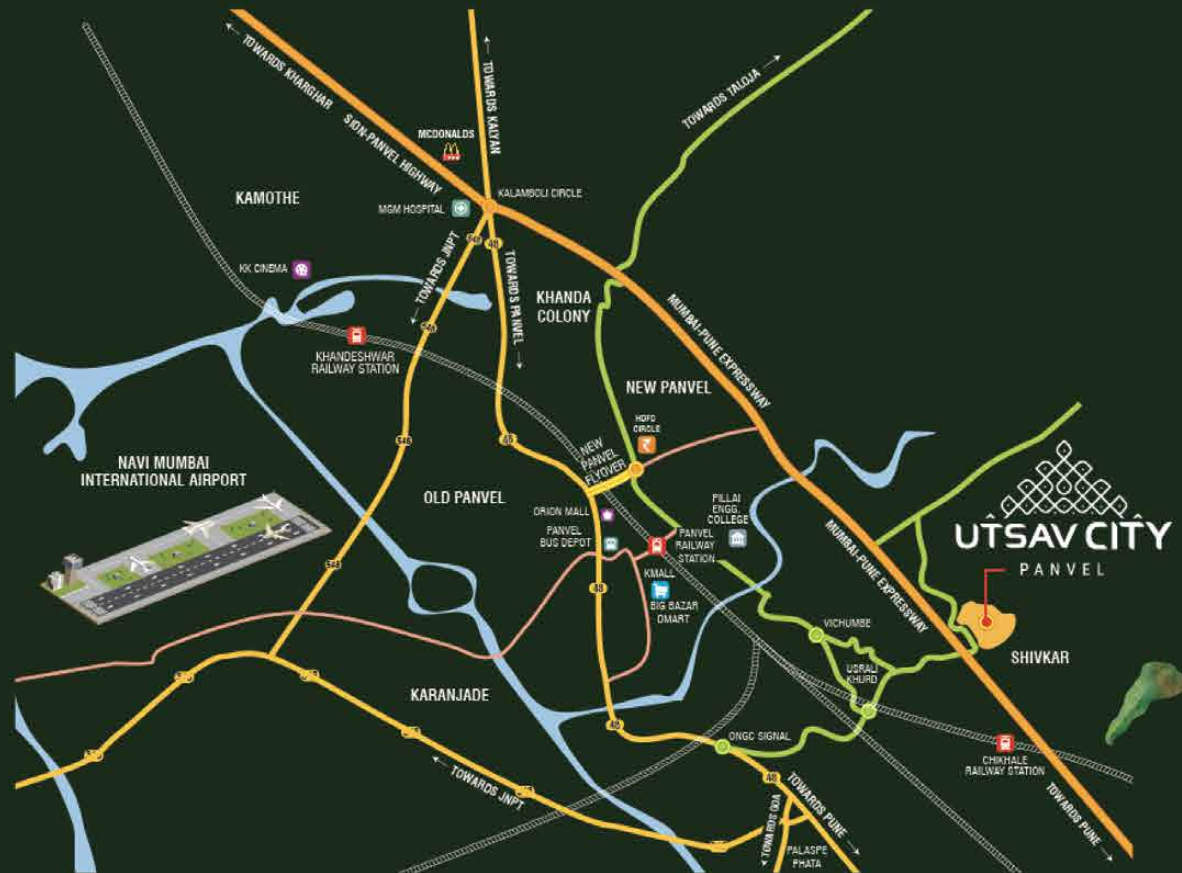

At Utsav City Solar Electricity panels and LED Lighting are part of the infrastructure planning which helps in illuminating common areas which results in a reduced electricity bill.

WATER CONSERVATION

Each flat comes with taps that regulate the flow of water, thereby reducing the water bill for the society.
